

Additional Services

1st Choice Leisure Buildings offer nationwide delivery on many products (delivery area may be limited on certain products) and we are proud to partner with a number of hand-picked and vetted specialist local contractors to offer fixed-price additional services such as old building removal, base construction, log cabin installation, painting services and electrical fit out. These additional services are available within the green area as shown on the map below (a 50 mile radius of our display site in Woking, Surrey).

If you are within the area indicated in green then please see our separate information and price sheet or ask for further details on how we can help with getting your project moving forwards. If your location lies outside of this area then we are happy to share the following list of potential contractors who may be able to assist with your project.

To be included on this list the contractor must have been recommended by a handful of our own customers however it is essential to understand that these contractors are not affiliated with 1st Choice in any way, nor have they been vetted in the same manner that our approved local contractors therefore their inclusion here does not infer any recommendation or approval by 1st Choice in any way. Any decision to work with them must be solely at your discretion as this will lie strictly outside of any contract between 1st Choice Leisure Buildings and yourself.

We would recommend that your due diligence checks should include seeking written confirmation of the cost and specification of their works, any potential additional charges that may be incurred, timeframe for completion and checks on their Public Liability Insurance and Waste Carriers Licence (where applicable).

Please do let us know if your experience with any of the contractors listed within this document does not live up to your expectations in any way. We will not hesitate to remove them from this list if customer feedback deems that this is necessary.

Building removals

<p>Prefabricated concrete and Asbestos buildings</p>	<p>Our approved contractors can remove this type of structure anywhere within mainland England and Wales. They are specialists in their field, fully trained & experienced with this type of structure, registered with the Environment Agency and adhere to all current Hazardous Waste Regulations. They do cost a little more than some companies but you do not want to risk issues with Asbestos disposal or dangerous working practices.</p>
<p>Timber buildings and greenhouses</p>	<p>Our approved contractors can remove these types of buildings within an extended 100 mile radius of our display site (this being a far larger area than the green area indicated on the map). We are not familiar with any contractors offering a similar service outside of this area therefore we recommend seeking a local contractor using one of the following websites:</p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div>
