

BEAUTIFUL LASTING COLOURS

EXTERIOR OPAQUE COLOURS FOR THE WHOLE HOUSE

Demidekk users enjoy painting. But not too often.

ADD COLOUR TO THE WHOLE HOUSE

Create a personalised and cohesive exterior colour palette. It pays off!

We are increasingly focussed on creating a uniform exterior colour palette. The façade of a house should be in harmony with the colour of its windows, doors, details, walls, decking and patio. That's why all our exterior colours are presented with recommended combination colours for the whole house.

Whether you envision a neutral colour palette or want a house with colourful flair, this colour chart will help you find beautiful and long-lasting colour combinations.

All Jotun's exterior products are developed, tested and produced in Norway. When you choose a product from Jotun, you can rest assured that your house will have the best possible protection.

Nina Klæboe Mørkve

Scandinavian Colour Manager, Jotun

BEAUTIFUL COLOURS

We work with paints and colours every day. We design and develop new colours, but we also think it is important to continue to offer popular and timeless exterior colours.

In this colour card we have collected beautiful, welcoming paints from our colour experts. All the colours are presented with recommended combination colours for the whole house – for the walls, decking, windows, door and details. A beautiful and cohesive colour palette, together with high quality products, will keep **your house looking lovely for years to come.**

WALL: JOTUN 9938 **BLACKENED BLACK**

EXTENSIVE TESTING

All Jotun exterior products are tested under extreme conditions before being approved and launched on the market.

Our test programmes are optimised to ensure that our products can truly withstand the harsh and changeable Scandinavian climate. That's why we test our paints in various places in Scandinavia.

The products also undergo extensive testing in our research laboratory and meet a number of strict requirements so that they can offer the best protection for your house at all times.

LONG-LASTING PROTECTION KEEPS HOMES AND HOUSES SAFE

The weather of the future demands durable paint. Choosing high-quality products that are developed to ensure long-term protection is a more sustainable choice. Find the colours that fit your house best and choose a paint from Jotun that ensures optimal and long-lasting protection. If you choose a high quality paint, it will be a long time before a new coat is needed, and you will feel secure in the knowledge that you have given your house the best possible protection.

MAJOR WEATHER VARIATIONS IMPOSE HIGH DEMANDS ON BOTH COLOURS AND PRODUCTS.
KRÅKENES LIGHTHOUSE IN NORWAY IS ONE OF SEVERAL PLACES WHERE WE TEST OUR PRODUCTS OUTDOORS.

UNIQUE PRODUCT CHARACTERISTICS

Your home is your most important possession. Choose one of Jotun's high-quality exterior paints with unique properties that ensure long-lasting protection.

Unique technology is the result of targeted innovation, extensive testing and groundbreaking product development.

Superior protection against water penetration and water damage over time provides your house with excellent protection, no matter the weather.

Colour and sheen durability ensure that your house stays aesthetically beautiful for years to come. With extreme colour and sheen durability, the house will look freshly painted for a long time.

Self-cleaning properties ensure a highly dirt-repellent surface and make it difficult for dirt to gain traction. This property also reduces the risk of fungal growth. This allows your house to retain its freshly painted appearance for a long time, and also makes it easier to keep the walls clean.

Nordic Swan Ecolabelled exterior paint – most of our DEMIDEKK products are Nordic Swan Ecolabelled. This makes it easy to choose an environmentally friendly option.

REFRESHING HARMONY

The palette of green colours includes golden, grey, and deep traditional green tones. When choosing a green hue, let the location and surroundings of the house be your guide.

Green colours are refreshing and pleasant. They create vibrant and colourful neighbourhoods. Green comes in endless tones. From deep, golden and traditional shades to more muted and modern green hues.

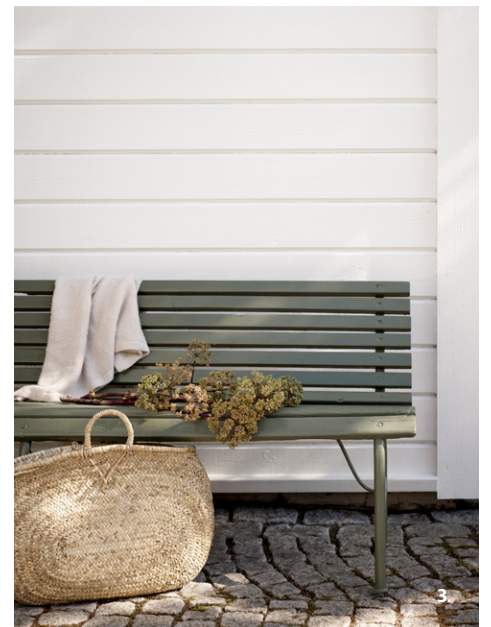

Complement the colour of your façade by choosing a lighter or darker version of the same colour for details and casings. This creates a subdued and cohesive impression. Grayish and golden white tones also pair beautifully with a green façade.

WALL: JOTUN 1108 FYN
WINDOW: JOTUN 0099 SORT

LIGHT AND AIRY

White, bright and light colours are often chosen for their timelessness, elegance and purity. The colours range from show-white hues to greyish or golden white tones.

All colours will appear brighter and cleaner on an entire wall compared to how they look in a small colour sample. The brightest white tones will look snow-white, while more subdued shades will seem softer.

Small differences in hue make a big difference to an entire façade. This year we are complementing our light-coloured bestsellers with a new grey-white tone, Jotun **1274 Dus**, as well as a timeless and beautiful grey tone called Jotun **1069 Villagrå**.

WALL: JOTUN 10168 MUTED YELLOW

TRENDY OPTIMISM

The yellow palette includes fresh and vibrant colours, classic ochre tones and muted, light yellow hues. The new colours Muted Yellow and Gentle Yellow are both trendy and beautiful.

Yellow façades give a vibrant, cheerful and energetic impression. The presence of colourful and pure yellow tones can brighten up a whole neighbourhood. Ochre yellow tones are known for their lovely interplay with the nature and vegetation in their surroundings.

In the yellow palette you will also find hues that create a more muted impression. JOTUN **10168 Muted Yellow** and **12136 Gentle Yellow** are two brand new, subdued yellow tones that will look beautiful on the façade of your house.

WHEN CHOOSING COLOURS, CONSIDER THE WHOLE HOUSE

Here you will find Jotun's most popular exterior colours, with combination suggestions from our colour experts. These combinations will give your house a harmonious look.

How to use the colour chart:

1. Choose a main colour.
2. All main colours have two recommended combination colours.
3. All main colours have a recommended decking colour. Contact your local dealer for more information on DEMIDEKK decking.

Be aware that different production numbers of this product can vary slightly in colour. If your packages have different production numbers, we recommend mixing the contents of the different packages before use and doing a test coat before the painting work begins.

CHOOSE A SUSTAINABLE HOUSE COLOUR

The main colour will be the starting point for the look of the house. Here are some tips to help you get started with choosing a colour.

Whether you want a calm or a contrasting colour palette, it is important to choose a colour that pairs well with the surroundings and neighbourhood. The right choice of a main colour will also highlight the style and architecture of the house itself.

Light colours will make your house appear larger, while dark colours will make the house less conspicuous. All colours in the colour chart have matching complementary colours and recommended colours for the decking.

CREATE A PERSONAL STYLE

Add colour to the whole house and see how it transforms the vibe of your home. The colour combinations you choose can give your house a personal and cohesive look.

The windows are the eyes of your home. Dark window frames make windows appear larger, while light frames make them look smaller. The greater the contrast between the façade and the window, the greater the focus on the window.

The decking should be varnished in a colour that harmonises with the colour of the house. To make your choice easier, all main colours have a recommended decking varnish colour.

The door welcomes you home. Here you can opt for a unique colour and give the house a touch of personal flair.

MODERN INTERPLAY

A nice interplay between colours and materials can highlight the architectural attributes of a house. You can use muted colours and natural elements to create exciting contrasts. Thoughtful colour choices give a house character and a personal touch.

The palette of grey and black colours allows you to choose from a range of hues with different characteristics. Create seamless and pleasant transitions by painting your house with grey tones from the same colour family.

Warm grey tones harmonise nicely with nature and the surroundings. In the black colours, the undertone determines whether they are perceived as warm and slightly brown-tinted, or whether they appear more grey or pitch black.

MUTED AND **DELICATE**

Blue shades can be delicate, timeless and unique. Muted blue tones can enrich an urban environment, emphasise a connection to the sea, and create exciting contrasts with modern materials.

Blue tones are often enhanced through their interactions with the sky, nature and the surroundings. That's why muted and slightly grey-blue tones look most beautiful outdoors.

Blue hues are ideal colours for the details of a house. A freshly painted door in the colour Jotun **5445 Delicate Blue** creates an inviting entrance and gives the house a delicious and unique detail.

WARM AND **INCLUSIVE**

Red hues have long traditions and are associated with charming, idyllic places. Red is a welcoming colour that sparks energy and joy and brings back great memories through its strong presence.

Red hues with a golden undertone harmonise best with nature's own colour palette. Our golden red colours include both bright and intense tones and deeper, more sophisticated shades.

The colour red has long and proud traditions, and through the centuries it has characterised and enriched the Scandinavian coasts and countrysides. You can rest assured that the red colours Jotun has chosen for our outdoor products are safe and secure.

BENCH: JOTUN 20118 **AMBER RED**
DECKING: JOTUN 90028 **SKYGGEBRUN**

WARM COMBINATIONS

Beige and brown hues are warm, harmonious and timeless, and can make their mark on classical as well as modern architecture. The house gets a natural look and the choice of detail colours underscores its style and atmosphere.

The way we experience light beige tones outdoors depends on the surroundings. In daylight, muted beige and brown tones take on a grey tint. To ensure you make the right colour choice, try the colour outdoors. Jotun's new **1141 Natural Beige** is a deliciously warm, grey-beige earth tone. For an even warmer impression, you should choose from the slightly redder beige and brown colours.

Jotun **0734 Brown Black** is a popular colour and perfect for those who want a dark but not completely pitch black house.
